

Test Plan 1 — UI Sanity (Marketing Site)

Project	chromium
Specs	tests/ui/**
Default filter	@other-smoke
Target	Marketing site — prod https://www.organuz.ai
Page objects	src/pages (HomePage , BlogPage)
Cases	12
Skips	None — this group is always expected to pass
Skill	ui-sanity-tests

Scope

Visibility-only sanity of the public marketing site: the homepage renders its hero, primary navigation, the six-agent roster, projects/FAQ sections, the contact form, and the blog index. These are read-only assertions against production — no forms are submitted, no data is written. They confirm the marketing site is up and its key sections are present after a deploy.

Preconditions

- Public internet access to `www.organuz.ai` (no credentials).
- Hebrew (RTL) content — some assertions match Hebrew strings (e.g. hero mentions "אור").

Cases

ID	CASE	ASSERTS	TAGS
UI-01	Hero heading is visible and mentions "אור"	Hero <code>h1</code> renders and contains the brand term	@ui @other-smoke
UI-02	Hero subtitle is visible	Hero subtitle text is present	@ui @other-smoke

ID	CASE	ASSERTS	TAGS
UI-03	Hero user-type selector buttons are visible	The audience-selector buttons render in the hero	@ui @other-smoke
UI-04	Primary navigation links are visible	Header primary nav links render	@ui @other-smoke
UI-05	Header CTA link is visible and points to the app	Header CTA is present and its href targets the product app	@ui @other-smoke
UI-06	"Why Organuz" section is visible	Section heading renders	@ui @other-smoke
UI-07	"Meet Or" section and its CTA are visible	Section heading + CTA render	@ui @other-smoke
UI-08	All six AI agents are showcased	The agent roster shows all six agents	@ui @other-smoke
UI-09	Projects showcase section is visible	Projects section heading renders	@ui @other-smoke
UI-10	FAQ section shows the first question	FAQ section heading + first question render	@ui @other-smoke
UI-11	Contact form exposes all of its fields	Every contact-form field is present (not submitted)	@ui @other-smoke
UI-12	Blog index loads with at least one article	Blog index renders ≥ 1 article	@ui @other-smoke

Run

```
npx playwright test --project=chromium
```

Notes

- Default-filtered to @other-smoke ; other @ui tests (if added) don't run in the default suite unless tagged. Adding/removing an @other-smoke UI test changes the documented count (12) — update CLAUDE.md and the parity skill.
- Never submit the contact form or perform writes — this runs against production.
